ABOUT IIIT NAGPUR

The Indian Institute of Information Technology, Nagpur was established by the Ministry of Education, Government of India, under the Public-Private Partnership scheme, and is declared an **"Institution of National Importance"** under the IIIT (PPP) Act, 2017. In its short journey, IIITN has carved a niche for itself in education, research and community outreach.

ABOUT TANTRAFIESTA

Tantrafiesta is the national-level annual technical fest of IIIT Nagpur and one of Central India's largest student-driven tech fests. This year's theme, **ANANTA: Surpassing the Possible**, celebrates technology's boundless potential through **Indian Maximalism**: vibrant, layered, distinctly Indian and unmistakably futuristic.

GDG ON CAMPUS

A GOOGLE FOR DEVELOPERS PROGRAM

Google Developer Groups on Campus is **Google's official university developer community program**, run by **Google for Developers** across 2,000+ campuses in 100+ countries. Our chapter at IIIT Nagpur brings students together to learn, build and ship, through workshops, hackathons, speaker sessions and flagship events like **EDGE CASE** and **KEEP ALIVE**.

1,658+

members in our

WHY PARTNER WITH A GOOGLE DEVELOPER COMMUNITY

Google-backed credibility

Your brand stands next to an official Google for Developers program.

Builders, not just attendees

Our members ship real projects in AI/ML, hardware, cloud and web.

On Google's own platform

Our events are listed on gdg.community.dev, Google's developer community platform.

Reach all year round

Workshops, hackathons and tech talks run through the year, not just at the fest.

GDG on Campus chapters are student-led and supported by Google for Developers.

EDGE CASE '26

A national **24-hour Physical AI hackathon**. Student teams build real devices that read sensor data, decide with an **on-device AI model** and act on the world, live on campus at Tantrafiesta '26.

SENSE.

Read real-world sensor data

THINK.

Decide with an on-device AI model

ACT.

Act physically on the world

KEEP ALIVE '26

Student teams **run on-call for a live cloud application** while faults are injected in real time. The top 15 teams keep a live Kubernetes system running on campus, then defend a **blameless postmortem**.

```
keep-alive@tantrafiesta:~$ tail -f incidents.log
```

```
[19:42:07] ALERT checkout-svc · p99 latency > 2s
[19:42:31] ACK team-07 is on-call
[19:43:50] TRACE cart-svc → redis: connection refused
[19:44:58] FIX rollback checkout-svc → v1.4.2
[19:45:10] OK SL0 restored · error budget safe
```

Observe
